Twelve media segments for the Central Queensland Healthy Waterways Project completed

The Central Queensland Healthy Waterways TV campaign for 2004 involves twelve stories each being 60 seconds in duration. These will be shown just before the weather on WIN TV Local News. The presenter is Peter Byrne who does the weather with stand-up by landholders, community, local government and industry people.

The 12 segments are on :

- | | |
|---------------------------------------|-----------------------------------|
| * treated effluent discharge | * industry codes of practice |
| * secondary School education programs | * catchment planning |
| * collaboration for weed management | * managing salinity |
| * barramundi stock management | * protecting shallow estuaries |
| * riparian zone grazing | * litter and Green Corp group |
| * managing marine water quality | * monitoring marine water quality |

For more information contact [Sharon Marks](#) or on (07) 4921 2843

Mary Woods steps down as Chair for QMDC and the RGC

We all would like to offer Mary Woods our thanks for all the work she has undertaken as both the Chair of the Queensland Murray Darling Committee (QMDC) and the Chair of the Regional Groups Collective (RGC) over the last couple of years. Mary Woods played a vital role in ensuring the new regional arrangements for natural resources management were successful. The QMDC was the first regional NRM body to complete a regional natural resource management plan and have paved the way for many of the other groups.

Mary was also the inaugural Chair of the Regional Groups Collective (RGC) and was a driving force in getting this group established and gaining acceptance from all the regional NRM bodies that this group was a key forum to engage other organisations at a State and Federal level.

We all wish Mary our best wishes and hope she enjoyed the "this is your life" presentation.

QMDC's new chair is Bim Goodrich and we welcome him to this role.

Adaptation to Climate Change in Regional NRM Plans

A new module for Adaptation to Climate Change has been added to the regional NRM web site. This module addresses climate change adaptation in regional NRM plans, target setting and investment strategies. This module does not directly address reducing greenhouse gas emissions. Its purpose is to help guide regional bodies in developing regional natural resource management (NRM) plans that address accreditation criteria relevant to climate change adaptation in NRM.

To access this new module click on this link [Adaptation to climate change module](#).
